

The Safety Store – Live Safe Hawaii LLC E - Weapon Informational Briefing

NOTICE This is NOT an AXON TASER Training Course.

This is a mandatory informational briefing required by law to purchase an E-Gun / Energy Weapon in the State of Hawaii.

Section 1 — State & City Requirements for Purchase

Licensed Seller: All TASER / E-Gun (electric weapon) purchases must be made from a licensed City & County of Honolulu E-Gun dealer. Live Safe Hawaii LLC (The Safety Store) is a registered and licensed E-Gun dealer. Our sales license is posted and visible within the store. Permit #43529

Age Requirement & Identification

Purchasers must be 21 years of age or older.

A valid Driver's License or State ID must be presented with your completed application at the time of purchase.

Background Check

A criminal background check is required for all E-Gun purchases.

Processed at the time of purchase. \$10 non-refundable fee applies.

Prohibited Persons

State law prohibits ownership or possession of an E-Gun by individuals with: Felony convictions, Domestic violence or drug-related offenses, Active TRO (Temporary Restraining Order), Ongoing psychiatric or mental health treatment. A valid medical marijuana card, Fugitive status in any county or state. Selling or transferring a TASER to a prohibited person is a criminal offense.

Section 2 — Important Safety & Use Notices / Warnings

Review all "Warnings and Dangers" materials included in your TASER kit. **Water**

Exposure: If your TASER has been submerged or exposed to water, do not use it. Return it to AXON for inspection or service.

Flammable Environments: Do not use, discharge, or store your TASER in flammable or explosive environments.

Intended Use: TASER devices are for **justifiable self-defense only**. Never aim, point, or discharge the device at anyone except in a lawful self-defense situation.

Treat as a Weapon: Handle your TASER with care and respect, similar to a firearm.

Conduct monthly inspections as recommended in the TASER manual. For firearm-style models, keep the device concealed in public areas. **Storage Requirements:** Keep your TASER secured and under your control at all times.

When not in use, store it in a locked, secure location.

If secure storage is unavailable, place it in a safe or locking case. **Disposal / Return:** TASER / E-Guns are non-transferable, non-sellable, and non giftable. If you no longer wish to own the device, return it to the Honolulu Police Department Weapons Division (Or local police dept) for disposal and obtain a police reference number. Alternatively, bring it to The Safety Store for de-registration and manufacturer return processing.

Section 3 — Your Energy Weapon Kit

1. Kit Exterior Case and sleeve with serial number.
2. TASER energy weapon and sleeve
3. Cartridges (2) One for practice. One for active use.
4. Paper target: To practice at home with 1 of the 2 cartridges.

Instruction manual and safety documents

5. Welcome/information packet

5a. **Quick Start: Review the Quick Start Guide before first use.**

Additional accessories are available for purchase. Staff will recommend suitable options based on your intended use.

Section 4 – Using your energy weapon

If you find yourself in a justifiable self-defense situation where de-escalation, avoidance, or safe retreat are not possible and you have no other lawful option, you may use your TASER device.

Note your distance to the target and the target's backstop before deployment. Be aware of your surroundings and any environmental hazards.

After deployment, confirm the device operated correctly before leaving the weapon on the scene. Move to a safe location and contact the police to report the incident.

Obtain your police report number and submit it to AXON for the Safe Escape Free Replacement Program.

Section 5 – Waiver / Declaration agreement

I understand that my AXON TASER energy weapon is not a toy and must be kept out of reach of children. Some TASER models may be mistaken for a firearm by law enforcement or others. I will never point or discharge a TASER at any person or animal except in a lawful act of self-defense.

I **acknowledge** that improper use, handling, or storage of an energy weapon may result in serious injury, including loss of eyesight or death. I assume full responsibility for any unsafe, improper, or unlawful possession or use of this device. Live Safe Hawaii LLC, The Safety Store — Hawaii State AXON Distributor, AXON, and their employees, agents, and affiliates shall not be liable for any injury, death, or property damage resulting from the possession or use of this TASER device.

I **agree** to remain informed of and comply with all applicable federal, state, and local laws regarding ownership and use of energy weapons in the State of Hawaii. I understand I am solely responsible for any use of my TASER, whether intentional, reckless, negligent, or accidental.

I **certify** that I am legally permitted to possess an energy conductive weapon under U.S. and Hawaii law. Specifically, I declare that I have no felony convictions, am not a fugitive from justice, and am not subject to any court order or legal restriction that would prohibit possession. I further declare that I am not currently under psychiatric treatment or committed for a mental condition that would disqualify me from possession, nor do I hold a medical marijuana card or similar status that would legally restrict ownership.

I **have provided my information accurately** and to the best of my knowledge. By signing this application (above), I acknowledge that I have received and understand the Energy Weapon Informational Briefing. I agree to all terms and conditions outlined in this application and briefing. I accept full responsibility for my purchase and ownership of this device in accordance with applicable laws and regulations.

All information on this application is required by law for the ownership of an E-Weapon.

I agree to the terms and conditions of this informational briefing and waiver.

Conductive Energy Weapon (CEW) Training - Questions & Answers

☐ SECTION 1 – General Knowledge Initial that you understand this section

A). What is a Conductive Energy Weapon (CEW)?

Answer: A CEW is an electronic device designed to temporarily incapacitate a person by delivering electrical pulses that disrupts brain to muscle signals causing muscular lock up (NMI).

B). What is the purpose of carrying a TASER?

Answer: To provide a lawful less-lethal self-defense option when circumstances justify its use.

C). What does NMI stand for?

Answer: Neuro Muscular Incapacitation (Muscular Lock Up)

D). What does DRIVE STUN stand for?

Answer: A close-contact mode where the TASER is applied directly to the body without firing probes, producing a localized electrical pain compliance effect. It does not provide the same neuromuscular incapacitation as probe deployment.

☐ SECTION 2 – Safety Initial that you understand this section

A). Treat every TASER as what?

Answer: As though it is loaded and ready to fire.

B). What direction should the TASER always be pointed?

Answer: In a safe direction or at the attacker.

C). Keep your finger where you are until you're prepared to fire?

Answer: Off the trigger.

D). What should you know before carrying a TASER?

Answer: How it operates, how to maintain it, and the laws governing its possession and use.

E). Should children have access to a TASER

Answer: No. TASER weapons should only be handled by those 21 years of age or older and those who have been properly trained and certified.

F). Can I turn on my AXON device if it was fully submerged in liquid?

Answer: No, it must be sent back to AXON for an evaluation.

G). Can I use my AXON device in a flammable environment?

Answer: NO. The electrical arc of the device may ignite the fumes.

☐ SECTION 3 – Operation Initial that you understand this section

A). How does a TASER stop an attacker?

Answer: By sending electrical pulses through two probes connected by wires, disrupting brain to muscle signal causing NMI (Muscular Lock up).

B). How many probes are fired?

Answer: Two

C). Why is probe spread important?

Answer: Greater probe spread generally increases effectiveness because more muscle groups can be affected.

D). What happens if only one probe makes a connection?

Answer: The device will not achieve neuromuscular incapacitation because a complete electrical circuit has not been established.

E). Can a TASER Pulse 2 still work in Drive Stun mode?

Answer: Yes. While the device is arcing, the front of the weapon can also be used with a follow up stun feature by driving the weapon into the attacker's body for electrical pain compliance. The follow up Drive Stun can also be used to complete a connection in situations where one probe missed.

F). The laser indicates targeting for which probe?

Answer: The laser indicates where the top probe will go. The other probe will be Strike 8 degrees below the top probe.

G). What is the probe spread upon deployment?

Answer: 8 degree spread

H). If the TASER is left on and inactive for 20 or more minutes, what will happen?

Answer: The TASER unit will shut off automatically

I). Can the Pulse 2 be reactivated after the 30 second cycle is completed?

Answer: Yes. The Pulse 2 NMI feature can be repeated up to 50 times.

J). What is the voltage of the Pulse 2 at the muzzle?

Answer: 50,000 volts

K). For the probes to complete a circuit, what is the maximum distance the probes can be away from the skin if it lodged in the clothing.

Answer: The probes need to be 1 inch or less from the skin to complete the circuit.

L). What is the best probe shot placement?

Answer: By using the beltline of the attacker as reference, placing the TASER Laser above the belt line so one probe strikes above the beltline and the other below. This spread will incorporate a group of upper and lower muscles.

M). What is the voltage and amps when NMI - Muscular lock up is active?

Answer: 1200-2000 volts at 0.00018 amperes.

☐ SECTION 4 – Effective Use Initial that you understand this section

A). What is the ideal distance?

Answer: Use the TASER within the recommended deployment range for your specific model as described in the manufacturer's instructions. 7-10 feet will give you a probe spread of approximately 13 inches. The max range of the civilian TASER is 15 feet with a 26 inch spread between probes.

B). After deployment, what should you do?

Answer: Prioritize your safety, move to a safer location if appropriate, and contact law enforcement as soon as it is safe to do so. Contact AXON with your Police report number for your Safe Escap replacement.

C). Can a TASER Pulse 2 be used for both NMI and also electrical stun?

Answer: Yes

D). Can a Strikelight be used for both NMI and electrical stun?

Answer: No, the Strikelight only uses an electrical stun for pain compliance.

☐ SECTION 5 – Legal Knowledge Initial that you understand this section

A). What is the primary purpose of a civilian TASER?

Answer: Lawful self-defense.

B). Can you threaten someone with a TASER?

Answer: Only under circumstances where its display or use would be lawful under applicable self-defense laws. Brandishing or threatening someone unlawfully may itself violate the law.

C). Who is responsible for knowing the law?

Answer: The individual carrying the TASER.

D). What is the purpose of the AFID TAGS (Anti felon identification tags)?

Answer: The AFID tags give law enforcement the resource to track down the owner of who deployed the TASER.

☐ SECTION 6 – Maintenance Initial that you understand this section

A). Should batteries be checked?

Answer: Yes. Every 30 days. Battery indicator colors: Green = Good. Yellow = Consider changing soon. Red = 20% or less, change battery now.

B). Should the cartridges be inspected?

Answer: Yes.

C). Should you routinely test your TASER?

Answer: Yes a spark test should be conducted every 30-60 days.

D). Where should my TASER be stored?

Answer: If not on my person, it should be in a secure location where unauthorized persons, especially children, cannot access it.

E). Should expired cartridges be replaced?

Answer: Yes. The expiration date is 5 years from manufacturing.

☐ SECTION 7 – Hawaii Initial that you understand this section

A). What documentation is generally required before purchasing a civilian TASER in Hawaii?

Answer: Students should know the current state requirements, including any required training, permits, or documentation that apply at the time of purchase.

B). Why is it important to know Hawaii self defense laws?

Answer: Because lawful possession does not automatically mean every use is legally justified.

C). Does this briefer replace an actual AXON TASER course?

Answer: No. The course is educational and does not replace an AXON TASER course.

D). In Hawaii, is a Stun Gun classified as an E-Gun / energy weapon?

Answer: Yes

E). Is this briefer a replacement for legal counsel?

Answer: No, this Information Briefer does not replace legal counsel.

☐ SECTION 8 – Situational Awareness Initial that you understand this section

A). What is the best self-defense strategy?

Answer: Avoid - evade - retreat - whenever safely possible.

B). Should you stay aware of your surroundings and have a plan to escape?

Answer: Yes. Have a plan ready to escape safely while the attacker is under NMI.

C). Is your TASER your only self defense tool?

Answer: No. Situational awareness, avoid - evade - and verbal de-escalation are also appropriate self defense tools.

D). After a self-defense incident, what should you do?

Answer: When it is safe to do so, contact law enforcement and make a Police report. Your report number is needed for AXON to send you a free replacement.

E). What is your ultimate goal?

Answer: To protect yourself or others from unlawful harm and safely end the encounter—not to punish or seek revenge.

Final Study Reminders: Know the law before carrying or using a TASER. Carry responsibly and maintain your equipment. Avoid confrontation whenever safely possible. Use force only when legally justified.
